[The order of these names does not indicate preference. You may find other names through other sources.]

Taylor County requires the Soil Analysis be done by a certified professional soil scientist, geologist or engineer. This person must show experience and knowledge of soil morphology to conduct adequate soil analyses.

Questions about who is qualified to do your soil analysis can be answered by contacting the Taylor County Sanitarian.

**Permits will not be issued until soil analysis results have been received by the Taylor County Sanitarian**
